Season Notes	No Cams this season, all monitoring was done from the ground by Arboretum Staff, USFWS, and DOEE.	1st Season with Cams	April 20, 2017 - DC 4 (Honor) Rescued at 23 days old due to right leg becoming lodged in the outer nest rails near the V, Honor was returned to the nest in perfect shape on April 21, 2017 Blood work performed revealed that DC 4 (Honor) is a female.	Valor had contracted West Nile virus – perhaps after falling from the nest, because he had no symptoms before that – and his deterioration was sudden and devastating. He was humanely euthanized August 7.
