June 20, 2018

American Eagle Foundation
P.O. Box 333
Pigeon Forge, TN 37868

Dear Friends:

I am pleased to recognize June 20, 2019 as “American Eagle Day” in the state of Montana.

The bald eagle was designated as the national emblem of the United States at the Second Continental Congress on June 20, 1782. The bald eagle represents our American values of freedom, courage, and justice for all. Once endangered, the bald eagle is now making a gradual and encouraging comeback in American skies and throughout Montana. The recovery of the bald eagle population was accomplished by vigilant efforts from concerned citizens and organizations across the U.S.

I commend the efforts of the American Eagle Foundation to honor the history of the bald eagle and celebrate its successful reclamation in Montana and across America. The bald eagle has and always will be an important symbol of the values we hold dear. I support the American Eagle Foundation’s continued commitment for the care and protection of America’s living symbol for all future generations to appreciate.

I encourage all Montanans to recognize June 20, 2019 as “American Eagle Day.”

Sincerely,

STEVE BULLOCK
Governor
